Tina:

Good news. I found our list of 107 (or so) WWTPs within the "nutrient universe". If I remember correctly, Paul L. and myself took that larger list of around 200 WWTPs in Montana. We deleted the ones that are on Indian Reservations, the ones that discharged into lakes and groundwater, the ones that otherwise do not discharge into state waters, etc. Some of the WWTPs were more like septic systems (such as subdivisions) and were not included. The list is attached. It is from 2008, so may need to be updated.
